

PassageManager™

Managing Tomorrow's Challenges, Today

PM

PassageManager™ is a revolutionary new addition to the range of ChartCo software, and is supplied as standard on installation.

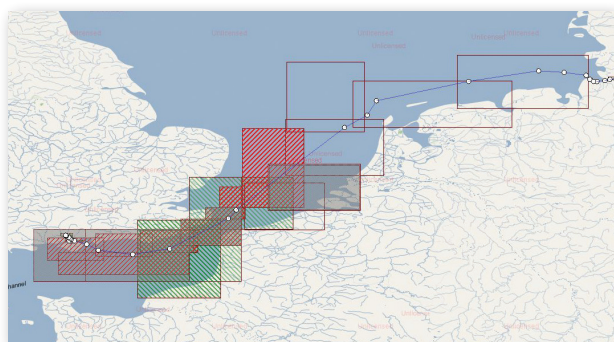

An intuitive graphical interface allows paper and electronic product catalogues or outfits to be displayed together with any correction or permit status.

PassageManager™ is integrated with oceanMaster™ allowing outfit and correctional information to be viewed either graphically or in a standard list view.

Through PassageManager™, additional services can be subscribed to, such as Port Data and Piracy Alert Data.

Using product, port, route, tidal and weather data, PassageManager™ can create a comprehensive passage plan within minutes.

Optimise passage planning.
Integrate with your ECDIS System.
Make every stage of navigation clear,
manageable, safe and compliant.
View the product you need for each
voyage at a glance.

Benefits

PassageManager™ allows 'at a glance' monitoring of product status for any route. Once plotted, the route can be 'filled in' with products required. The system automatically provides the status of each overlaid product using a simple colour code.

Using the passage planning facility, the user can easily identify what products are not part of the ships holdings or what electronic products do not have a valid license. These products / licenses can then be ordered from a supplier of choice.

Through an additional subscription, PassageManager™ can display comprehensive port data from one of the world's leading authorities on the subject. Every port can be interrogated for the information required and photos, port plans, and arrival documentation viewed and / or printed out.

PassageManager™ is fully compatible with Admiralty Digital Products, and ChartCo MetManager™. Together with port, piracy and product data, passage plans can be created at the touch of a button. These plans can be tailored for use in order to comply with the company policy.

PassageManager™ also allows collection and downloading of individual ENC cells from the ChartCo secure server. Combined with the facility of ordering permits, this makes the management of ENC data truly trouble free.
