

# Piracy Alert Data

Up-to-date live piracy data

## PAD

ChartCo's Piracy Alert Data is sourced from the International Maritime Bureau (IMB) Piracy reporting Centre (PRC). Its main objective is to be the first point of contact by the vessel in reporting an actual or attempted attack.

The ChartCo service enables round-the-clock watch on the world's shipping lanes, reporting pirate attacks and issuing warnings about piracy hotspots to shipping.

It is integrated into PassageManager™ as a Live Piracy Map showing all the piracy and armed robbery incidents reported to the IMB Piracy Reporting Centre.

## Benefits

Piracy Alert Data raises awareness on the vessel of areas of high risk associated with piratical attacks.

Data can be accessed via PassageManager™, ensuring that you benefit from the most up to date piracy data available.

Full integration means that all piracy data is included in any passage planning.

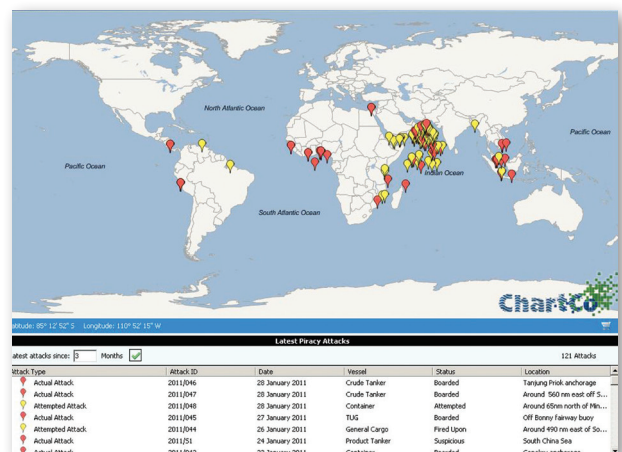

Graphical display of piratical hotspots.

Can be integrated with passage planning.

Updated daily.

## Key Features

- Updated daily.
- Full integration with PassageManager™.
- Reports on all historical events.
- Available through quarterly or annual subscription.
