

ChartCo Select

Data delivery via email or internet

Se

ChartCo Select enables a vessel to manage all of its services and download updates via either:

- Direct internet IP connection to the ChartCo server.
- As email attachments via the vessel's normal communications system.

ChartCo Select enables quick and easy download of all ChartCo data services at the touch of a button. Data collection can be on demand or automated, making best use of the communication systems available.

Benefits

ChartCo Select can be used on a stand-alone basis, alongside the ChartCo Broadcast Service on a single vessel, or within mixed fleet applications. It is simple to use and can be accessed over any internet connection including 3G, GPRS, Broadband, WiFi or via email.

Using the comprehensive software provided, vessels can request as much, or as little, data as is required.

Combined with ChartCo proprietary compression techniques, communication costs are kept to an absolute minimum.

Each month vessels receive cumulative data CDs ensuring safety and compliance at all times.

Key Features

- Monthly cumulative data CD.
- Compatible with all maritime data communication systems.
- Proprietary compression techniques keep communication costs to a minimum.
- Software can be configured to allow the end-user to collect only the data that is required at that time, minimising communication costs.

Requirements

- Access through 3G, GPRS, Broadband, WiFi or Iridium Openport.
- Most standard email systems supported for automatic collection of data.
- Standard PC meeting ChartCo's minimum requirements which can be networked or stand-alone.

Stay connected with complete control of all your ChartCo data services. Download only the data you need, exactly when you want it, how you want it.
