Charcoo  
766 Finchley Road,  
LONDON NW11 8DS  
England.

Att'n: Dr A. Norris.

Dear Sir,

**Charcoo Transmitted Chart Corrections System.**

Thank you for your hospitality this week during my visit to your headquarters in London.

We discussed and examined your system and in all the key areas of:

- data integrity,
- error trapping,
- error correction
- back up integrity,
- data availability,
- technical support,
- system availability.

I conclude that the Charcoo system will meet our requirements and perform as an alternative to the traditional system for distribution of weekly Notices to Mariners to ships and will ensure timely receipt on board of accurate and effective copies of the weekly notices and trackings.

27<sup>th</sup> May 1999

SP17

Capt. D. Howell  
Principal Surveyor.

C.C. Mr Salmon, Shell, London.

I trust this will be satisfactory.

Yours sincerely

I am therefore prepared to offer, by this letter, our provisional approval for the system to be used in Isle of Man ships.  
I would intend that once the system is in use in one or more Isle of Man ships, and I have received reports of satisfactory performance in service from the users on board, I will be in a position to provide a formal letter of approval for use of the system in Isle of Man ships.

Approved, On file
